25.05.2023
Community Live Event

- Winner announcement
- Community Award Vote

“Build an application that allows users to create and manage DAOs (powered by Sophia Smart Contracts) with their Superhero Wallet at least on æternity testnet (preferably also mainnet) via an user interface.”

Project

- Meaningful name
- Include all team-members on DevPost

Demo Video

- ~ 3 minutes length
- Publicly available
- Walkthrough the application

Application

- URL to a deployment of your application that must be hosted at least until the judging period is over
- Judges should be able to use the application with their Superhero Wallet

Description

- What does your project?
- Why did you build it?
- What was your focus?

GitHub Repo

- Appropriate Open Source License
- Contracts, Services & UI implementation
- Meaningful README with instructions how to run the application

Technical Reviews

Code Quality

- Is the code well-organized and easy to read?
- Does the code follow best practices and coding standards?
- Are the variable names descriptive and meaningful?

Security

- Are there any potential exploits or weaknesses that could be exploited by attackers?
- How big is the impact of potential exploits?

General

- Quality of the README / Documentation
 - Architecture
 - Contract ID(s) for deployment on testnet and/or mainnet
 - How to run the services?
- Completeness and functionality?
 - Smart Contracts
 - UI + Wallet Connection

Functionality

- Does the project work as expected?
- Are there any bugs or errors?
- How good is the test coverage? (specifically important for Smart Contracts)
- Is the user interface intuitive and easy to use?

æternity / blockchain

- Is there a meaningful usage of specific protocol features?
- Does this project require æternity / a blockchain at all?
- Implementation is compliant with established token standards (e.g. AEX-9, AEX-141)

What's next?

Fundraising & Grants

Crowdfunding with ICOs / STOs

- Issuance of a utility token / security token (equity with voting rights)
- Allow buyers to invest in the project by buying tokens in exchange for existing cryptocurrency like e.g. AE

Articulate the **PROBLEM & SOLUTION**.

Be transparent about **RISKS and CHALLENGES**

Venture Capital / Angel Investments

Create a **BUSINESS PLAN** that outlines

- Vision
- Business Model
- Target Market
- Revenue Streams

- Receive investment from firms / individuals in exchange for equity
- Expertise, resources, mentorship & connections
- Many VCs and Angel Investors focus on blockchain & web3 startups

Establish **TRUST** and **CREDIBILITY**

Highlight your team's experience

DAOs

- Define a mission
- Attract people / investors that join your mission
- Establish a self-governing member-owned community / DAO
- Work in a decentralized organization towards the common goal

Grant programs

- Typically support open-source development to strengthen the underlying ecosystem
- Apply for a grant at the æternity crypto foundation

How to raise funds?

THANKS!
